KEYSTONE AI PROTOCOLS // TIER 01 ($49.50 USD) OFFICIAL SETUP GUIDE • PDF-01

PDF-01: Setting Up Your 4-Folder AI Brain Workspace

Foundation Step 1: Organizing Google Antigravity So Your AI Never Forgets Your Project

1. WHY AN ORGANIZED AI BRAIN BEATS RANDOM CHAT WINDOWS

When you build a custom home, you never dump lumber, wiring, and plumbing fixtures into one messy pile on the subfloor. Yet 95% of people use AI by typing random prompts into one long chat thread until the AI forgets their voice, loses track of files, and makes mistakes. In **Tier 01**, we solve that permanently by organizing a clean **4-Folder AI Brain Workspace** inside **Google Antigravity ($30/mo plan)** right on your computer.

2. VISUAL 4-FOLDER AI BRAIN DIRECTORY MAP (INCLUDED IN YOUR .ZIP PACK)

Unzip **Keystone_Tier01_Antigravity_Brain_And_Flow_Prompt_Pack.zip** from your Welcome Email and move the **My_AI_Brain_Starter** folder onto your Desktop. Inside, your 4 core folders are ready to go:

FOLDER 01 // 01_Brain_Rules/

Holds **AGENTS.md** — your permanent brand voice, target audience, and operating rules loaded at the start of every chat.

FOLDER 02 // 02_Video_Prompts/

Holds your **~20-word (18 to 22 word)** 10-second Google Flow video scene prompts and generator templates.

FOLDER 03 // 03_Project_Notes/

Holds your episode topics, research checklists, and simple planning notes in one clean place.

FOLDER 04 // 04_Exports/

Your organized staging yard for finished scripts, reference photos, and exported 1080p MP4 video clips.

3. STEP-BY-STEP: INITIALIZING YOUR WORKSPACE IN 5 MINUTES

1. **Step 1:** Open **Google Antigravity** on your computer and click **File → Open Folder**.
2. **Step 2:** Select your unzipped **My_AI_Brain_Starter** folder on your Desktop (or create a clean folder named **My_AI_Brain**).
3. **Step 3:** Copy **Master Prompt #1** from the box below and paste it directly into the Google Antigravity chat window:

COPY-PASTE MASTER PROMPT #1 (PASTE INTO GOOGLE ANTIGRAVITY):

```
You are my lead AI Systems Architect inside Google Antigravity. Verify or create my 4-folder AI Brain workspace: 01_Brain_Rules, 02_Video_Prompts, 03_Project_Notes, and 04_Exports. Always read 01_Brain_Rules/AGENTS.md at the start of every session so you remember my brand voice, target audience, and ~20-word Google Flow video prompt rules. Reply with a 3-bullet confirmation when ready.
```

Next Step (→ Open PDF-02): Once Antigravity confirms your 4 folders are ready, open **PDF-02** to fill in your personal brand details inside **01_Brain_Rules/AGENTS.md**!

PDF-02: Locking In Your AI Memory with AGENTS.md

Foundation Step 2: Teaching Your AI Your Brand Voice, Audience & Rules Once and For All

1. HOW 01_Brain_Rules/AGENTS.md LOCKS IN PERMANENT MEMORY

Think of **01_Brain_Rules/AGENTS.md** as the master blueprint pinned to the wall of your job-site office. Every time you open your workspace in Google Antigravity, your AI reads **AGENTS.md** automatically. Instead of repeating who you are, what your business does, or how long your video prompts should be, you write it once here and your AI remembers it every single session.

2. FILL-IN-THE-BLANK TEMPLATE FOR 01_Brain_Rules/AGENTS.md

Open **My_AI_Brain_Starter/01_Brain_Rules/AGENTS.md** (or paste the block below into a new file named **AGENTS.md** inside **01_Brain_Rules/**) and replace the 4 bracketed lines with your own details:

FILE: 01_Brain_Rules/AGENTS.md (COPY & CUSTOMIZE TOP 4 LINES)

```
# AGENTS.md - Master AI Brain Rules

## 1. My Identity & Brand Positioning
- Founder / Presenter Name: [Replace with Your Full Name]
- Brand / YouTube Channel Name: [Replace with Your Brand or Channel Name]
- Core Niche & Target Audience: [Replace with Who You Help & What You Teach]
- Primary Website / Offer Link: [Replace with YourWebsite.com]

## 2. Permanent Operating Rules
- Rule 1 (Voice & Tone): Speak in clear, practical, first-person authority with zero fluff.
- Rule 2 (~20-Word Google Flow Video Rule): Every 10-second Google Flow video clip MUST use strictly 18 to
22 spoken words (~20 words) so the voiceover finishes naturally around 8.8 seconds without cutting off.
- Rule 3 (3-Chip Visual Continuity): Format every Google Flow scene prompt on a single line:
  Presenter says: "[18-22 spoken words]" Camera: With reference to me avatar, wearing cloth_1 with
background background_1, [studio camera movement & gesture]
- Rule 4 (Folder Hygiene): Save all video scripts in 02_Video_Prompts/ and notes in 03_Project_Notes/.
```

3. VERIFY YOUR AI BRAIN MEMORY IN 30 SECONDS

After saving **01_Brain_Rules/AGENTS.md**, paste this quick verification prompt into Google Antigravity:

MEMORY VERIFICATION TEST PROMPT:

```
Read my 01_Brain_Rules/AGENTS.md file and summarize my brand identity, my target audience, and my exact
Google Flow word-count rule in 3 short bullet points.
```

Next Step (→ Open PDF-03): Now that your AI Brain remembers your brand and the 18–22 word rule, open **PDF-03** to run your first 10-second video clip in Google Flow!

PDF-03: Basic Google Flow 10-Second Video Walkthrough

Foundation Step 3: Pairing 3 Reference Photos with ~20-Word Scene Prompts & Exporting MP4s

1. WHY MOST AI VIDEOS FAIL (AND HOW OUR 3-CHIP + ~20-WORD FORMULA FIXES IT)

Beginners run into two roadblocks in Google Flow: (1) their character and background change randomly on every clip, and (2) they type 40+ words into a 10-second clip so the voice cuts off mid-sentence. Our Keystone formula solves both: lock in **3 Reference Photos** for visual continuity, and keep every spoken line between **18 and 22 words (~20 words)**.

2. PREPARE & UPLOAD YOUR 3 REFERENCE IMAGES IN GOOGLE FLOW

CHIP 1 // Avatar (Me)

One clear, well-lit chest-up headshot photo looking straight at the camera lens.

CHIP 2 // Outfit (cloth_1)

One clean reference photo of your signature outfit (e.g., dark blazer or crewneck sweater).

CHIP 3 // Room (background_1)

One clean 16:9 photo of your studio, office, or boardroom with zero people in frame.

3. STEP-BY-STEP: GENERATE & EXPORT YOUR 10-SECOND MP4 VIDEO CLIP

1. **Step 1 (Generate Prompts in Antigravity):** Paste **Master Prompt #2** below into Google Antigravity to write 3 sequential 10-second clips for your topic.
2. **Step 2 (Attach 3 Chips in Google Flow):** Open Google Flow, choose **Video (16:9, 10s)**, and attach your 3 reference chips (**Me**, **cloth_1**, **background_1**) in the prompt box.
3. **Step 3 (Paste & Render):** Paste Scene 1 into Google Flow and click **Generate**. Because the spoken line is 18 to 22 words, speech finishes smoothly at ~8.8s with zero cutoff!
4. **Step 4 (Export 1080p MP4):** Click **Download** / **Export MP4 (1080p)** and save it into **04_Exports/01_clip.mp4**.

COPY-PASTE MASTER PROMPT #2 (~20-WORD GOOGLE FLOW SCENE GENERATOR):

```
Using my rules in 01_Brain_Rules/AGENTS.md, write 3 sequential 10-second Google Flow video scene prompts about [INSERT TOPIC]. Keep each spoken quote strictly between 18 and 22 plain-English words (~20 words), and format each clip on a single line:
Presenter says: "[18-22 words spoken voiceover]" Camera: With reference to me avatar, wearing cloth_1 with background background_1, [grounded studio gesture and 35mm cinema camera framing]
```

Next Step (→ Open PDF-04): Open **PDF-04** for ready-to-paste scene templates, troubleshooting, and how to use your **7-Day Guided Setup Window (up to 3 follow-up questions)**!

PDF-04: Scene Prompt Templates & 7-Day Setup Support

Foundation Step 4: Plug-and-Play ~20-Word Google Flow Prompts, Troubleshooting & Follow-Up Q&A

1. PLUG-AND-PLAY 10-SECOND GOOGLE FLOW SCENE TEMPLATES (18–22 WORDS)

Attach your 3 reference chips (**Me**, **cloth_1**, **background_1**) in Google Flow and paste any of these verified 20-word scene templates:

```
[Scene 1 - Intro Hook (20 words)]:
Presenter says: "Most people get frustrated with AI because messy single chat threads forget your project rules every time you start fresh." Camera: With reference to me avatar, wearing cloth_1 with background background_1, medium close-up speaking warmly to lens on a 35mm cinema camera.

[Scene 2 - The 4-Folder Fix (20 words)]:
Presenter says: "Instead of starting from scratch each morning, our workspace keeps every rule, script, note, and export inside four dedicated folders." Camera: With reference to me avatar, wearing cloth_1 with background background_1, grounded two-handed builder framing gesture in studio.

[Scene 3 - The 20-Word Pacing Rule (20 words)]:
Presenter says: "Keeping each ten second prompt around twenty words lets the voice finish smoothly with a natural breath before the cut." Camera: With reference to me avatar, wearing cloth_1 with background background_1, calm authoritative nod with subtle push-in.

[Scene 4 - Call to Action (20 words)]:
Presenter says: "Start with this clean four folder foundation, subscribe to the channel, and visit our website for the full setup blueprint." Camera: With reference to me avatar, wearing cloth_1 with background background_1, welcoming open-hand builder gesture.
```

2. QUICK TROUBLESHOOTING CHECKLIST

- **Audio rushes or cuts off at 10 seconds?** Trim 2 to 3 words from your spoken quote so it sits between 18 and 21 words, and write numbers out as words (e.g., *"ten second"*, *"twenty words"*).
- **Clothing or background shifts between clips?** Confirm all 3 reference chips (**Me**, **cloth_1**, **background_1**) are attached in the Google Flow prompt bar before clicking Generate.
- **Antigravity doesn't see AGENTS.md?** Make sure you opened the parent **My_AI_Brain_Starter** folder via **File → Open Folder**.

3. HOW TO USE YOUR 7-DAY GUIDED SETUP WINDOW (UP TO 3 FOLLOW-UP QUESTIONS) & TIER 02 SYNERGY

• **On Your Buyer Setup Page or By Email:** Open the gold link in your Welcome Email (**keystonerecomposition.com/ai-protocols/?uid=YOUR-KR-UID**) or reply directly to your Welcome Email anytime during your first 7 days with up to **3 setup follow-up questions**. Our system will email your custom step-by-step answer straight to your inbox.

• **Ready for Stage 2 (Tier 02 — $199 Website & Multi-Agent Suite)?** Your Tier 01 4-folder AI Brain is the exact foundation that **Tier 02 ($199)** plugs into to build your custom dark-luxury website, YouTube Brand Channel, and Multi-Agent workflows, and **Tier 03 ($800)** wraps into your own standalone **.exe Tauri Desktop App**!
