PDF-01: Setting Up Your 4-Folder AI Brain Workspace

Foundation Step 1: Organizing Google Antigravity So Your AI Never Forgets Your Brand (Page 1/2)

1. WHY A LOCAL AI BRAIN BEATS CHAOTIC CHAT WINDOWS

When building a custom home, you never leave blueprints scattered across the site. Yet 95% of creators type random prompts into single chat threads that forget everything the moment the window closes. In **Tier 01**, we solve this by organizing a clean **4-Folder AI Brain Workspace** inside **Google Antigravity ($30/mo)** that remembers your voice, prompts, and assets permanently.

2. SYSTEM ARCHITECTURE DIAGRAM (OVERVIEW)

01_Brain_Rules/ > AGENTS.md
Stores brand voice, ~20-word video pacing rules, and 3-chip visual references.

02_Video_Prompts/
Stores 10-second scene prompts and visual B-roll descriptions for Google Flow.

03_Website_Builder/
Holds dark-luxury Gutenberg blocks (#04070d, #d4af37) and comparison tables.

04_YouTube_Channel/
Holds 480-character tag stacks, upload defaults, and Short-to-Long bridges.

→ **See Page 2** for the step-by-step initialization instructions and Copy-Paste Master Setup Prompts!

PDF-01: Setting Up Your 4-Folder AI Brain Workspace

Foundation Step 1: Organizing Google Antigravity So Your AI Never Forgets Your Brand (Page 2/2)

3. INITIALIZING YOUR WORKSPACE IN 5 MINUTES (STEP-BY-STEP)

1. **Step 1:** Create a folder named **My_AI_Brain** on your drive (e.g. *Documents/My_AI_Brain*).
2. **Step 2:** Open **Google Antigravity**, click **File → Open Folder**, and select *My_AI_Brain*.
3. **Step 3:** Copy **Setup Prompt #1** below and paste it into the Antigravity chat window.

COPY-PASTE SETUP PROMPT #1 (FOLDER SCAFFOLDING):

```
You are my Lead AI Systems Architect inside Google Antigravity. Verify or create my 4-folder AI Brain
workspace: 01_Brain_Rules, 02_Video_Prompts, 03_Website_Builder, and 04_YouTube_Channel. Always read
01_Brain_Rules/AGENTS.md at the start of every session so you remember my brand voice, target audience, and
~20-word Google Flow video prompt rules. Reply with a 3-bullet confirmation when ready.
```

4. BRAND VOICE & TOPIC CALENDAR INITIALIZATION

COPY-PASTE SETUP PROMPT #2 (INTERACTIVE BRAND VOICE INTERVIEW):

```
Read my starter files. Interview me with 5 simple questions about my company name, target audience, core
offer, website link, and preferred tone of voice. When I answer, write my complete profile into
01_Brain_Rules/AGENTS.md and generate my first 10 video episode topics in 02_Video_Prompts/Topic_Roadmap.md.
```

Verification Check: Ask Antigravity: *"What are my 3 permanent rules from AGENTS.md?"* If it replies instantly with your rules, your AI Brain memory is officially locked in!

NEXT STEP → OPEN PDF-02

Open **PDF-02 (KR_T1_02_AGENTS_MD_Memory_And_Rules_Guide.pdf)** to master the complete AGENTS.md syntax and guardrails!

KEYSTONE AI PROTOCOLS // TIER 01 ($49.50 USD) FOUNDATION • PDF-02

PDF-02: Locking In Your AI Memory with AGENTS.md

Foundation Step 2: Teaching Your AI Your Brand Voice, Audience & Guardrails Once and For All

1. HOW 01_Brain_Rules/AGENTS.md LOCKS IN PERMANENT MEMORY

Think of **01_Brain_Rules/AGENTS.md** as the master architectural blueprint pinned to the wall of your job-site office. Every time you open your workspace in Google Antigravity, your AI reads **AGENTS.md** automatically. You define your brand, audience, and ~20-word video rules once, and your AI applies them across every single session.

2. FILL-IN-THE-BLANK TEMPLATE FOR 01_Brain_Rules/AGENTS.md

Open **My_AI_Brain/01_Brain_Rules/AGENTS.md** and replace the bracketed sections with your custom business details:

FILE: 01_Brain_Rules/AGENTS.md (CUSTOMIZE THESE 4 SECTIONS)

```
# AGENTS.md — Master Brand Voice & Operating Rules
## 1. Identity & Positioning
- Presenter / Founder: [Your Name] (e.g. John Doe, Founder & Systems Architect)
- Channel / Company: [Your Channel Name] • Primary URL: [https://yourwebsite.com]
- Core Audience: [Who you teach / service] • Tone: Pragmatic, first-person builder authority
## 2. Inviolable Video Pacing Rules
- Rule 1 (~20-Word Rule): Every 10-second Google Flow scene MUST use strictly 18 to 24 spoken words (~20 words)
so voiceover delivers smoothly in ~8.8s without clipping.
- Rule 2 (3-Chip Reference Invariant): Every scene prompt must reference:
  With reference to me avatar, wearing cloth_1 with background background_1, [Action]
- Rule 3 (Folder Hygiene): Save video scripts in 02_Video_Prompts/ and blog HTML in 03_Website_Builder/.
```

3. MEMORY VERIFICATION TEST PROMPT (RUN IN ANTIGRAVITY)

VERIFICATION PROMPT:

```
Read my 01_Brain_Rules/AGENTS.md file and summarize my brand identity, target audience, and exact Google Flow
word-count pacing rule in 3 short bullet points.
```

Next Step (→ Open PDF-03): Once Antigravity affirms your brand rules, open **PDF-03** to generate and export your first 10-second MP4 video clip in Google Flow!

KEYSTONE AI PROTOCOLS // TIER 01 ($49.50 USD) FOUNDATION • PDF-03

PDF-03: Google Flow 10-Second Video Walkthrough

Foundation Step 3: Pairing 3 Reference Photos with ~20-Word Scene Prompts & Exporting 1080p MP4s

1. THE 3-CHIP + ~20-WORD FORMULA FOR GOOGLE FLOW

Beginners struggle with two roadblocks in Google Flow: (1) character outfits and studio backgrounds shift randomly between clips, and (2) long dialogue cuts off mid-sentence. Our solution: lock in **3 Reference Photos** for character continuity, and enforce strictly **18 to 24 spoken words (~20 words)** per 10-second clip.

2. UPLOAD YOUR 3 REFERENCE ASSETS IN GOOGLE FLOW

CHIP 1 // Avatar (Me)
One clear, eye-level chest-up headshot with clean studio lighting.

CHIP 2 // Outfit (cloth_1)
One flat-lay photo of your signature long-sleeve blazer or crewneck.

CHIP 3 // Room (background_1)
One 16:9 photo of your studio or office with strictly zero people.

3. GENERATE & EXPORT YOUR 10-SECOND CLIP (STEP-BY-STEP)

1. **Step 1:** Paste **Master Prompt #2** into Antigravity to generate 3 sequential 10-second scene prompts.
2. **Step 2:** Open Google Flow, select **Video (16:9, 10s)**, and attach your 3 reference chips (**Me**, **cloth_1**, **background_1**).
3. **Step 3:** Paste Scene 1 and click **Generate**. Voiceover finishes at ~8.8s with a natural breath!
4. **Step 4:** Click **Download MP4 (1080p)** and save into *04_Exports/Clip_01.mp4*.

COPY-PASTE MASTER PROMPT #2 (~20-WORD SCENE GENERATOR):

```
Using my rules in 01_Brain_Rules/AGENTS.md, write 3 sequential 10-second Google Flow scene prompts about [INSERT TOPIC]. Keep each spoken dialogue strictly between 18 and 24 plain words (~20 words), and format each clip on a single line:
Presenter says: "[18-24 spoken words]" Camera: With reference to me avatar, wearing cloth_1 with background background_1, [35mm cinema framing & gesture]
```

Next Step (→ Open PDF-04): Access 15 plug-and-play scene templates and setup support details in **PDF-04**!

KEYSTONE AI PROTOCOLS // TIER 01 ($49.50 USD) FOUNDATION • PDF-04

PDF-04: Scene Prompt Templates & 7-Day Setup Support

Foundation Step 4: 15 Plug-and-Play ~20-Word Prompts, Troubleshooting & Follow-Up Q&A

1. PLUG-AND-PLAY 10-SECOND SCENE TEMPLATES (STRICTLY 18-24 WORDS)

Attach your 3 reference chips (**Me**, **cloth_1**, **background_1**) in Google Flow and paste any of these proven templates:

```
[Hook Scene (20 words)]:
Presenter says: "Most people struggle with artificial intelligence because disorganized chat windows lose track of your business rules every single time." Camera: With reference to me avatar, wearing cloth_1 with background background_1, medium close-up speaking warmly to lens, 35mm anamorphic push-in.

[Solution Scene (20 words)]:
Presenter says: "Instead of starting from scratch each morning, our workspace organizes your rules, scripts, notes, and exports into four permanent folders." Camera: With reference to me avatar, wearing cloth_1 with background background_1, grounded two-handed builder framing gesture in studio.

[Pacing Scene (20 words)]:
Presenter says: "Keeping each ten second script around twenty words allows the voice to finish smoothly with a natural breath before cutting." Camera: With reference to me avatar, wearing cloth_1 with background background_1, calm authoritative builder nod with slow tracking.

[Call to Action (20 words)]:
Presenter says: "Start with this clean four folder foundation, subscribe to the channel, and visit our website for the complete blueprint." Camera: With reference to me avatar, wearing cloth_1 with background background_1, welcoming open-palm gesture beside drafting table.
```

2. RAPID TROUBLESHOOTING CHECKLIST

- **Audio cuts off at 10s?** Trim 2 words so your quote sits between 18 and 22 words, and spell out numbers as words.
- **Wardrobe or room shifts?** Confirm all 3 reference chips (Me, cloth_1, background_1) appear in prompt box before generating.
- **Antigravity forgets rules?** Make sure you opened the parent My_AI_Brain directory via File → Open Folder.

3. 7-DAY GUIDED SETUP WINDOW (UP TO 3 QUESTIONS) & TIER 02 SYNERGY

• **Member Support:** Open your private portal (**keystonerecomposition.com/ai-protocols/?uid=YOUR-UID**) or reply to your Welcome Email with up to **3 setup follow-up questions**. Our team responds directly.
• **Ready for Tier 02 ($199)?** Your 4-folder Brain plugs directly into Tier 02 to build your dark-luxury website, YouTube Brand Channel, and 4-Agent Role Swarm, and Tier 03 ($800) compiles into a standalone **Windows .EXE Desktop App**!
