PDF-03: Google Flow 10-Second Video Walkthrough

Foundation Step 3: Pairing 3 Reference Photos with ~20-Word Scene Prompts & Exporting 1080p MP4s

1. THE 3-CHIP + ~20-WORD FORMULA FOR GOOGLE FLOW

Beginners struggle with two roadblocks in Google Flow: (1) character outfits and studio backgrounds shift randomly between clips, and (2) long dialogue cuts off mid-sentence. Our solution: lock in **3 Reference Photos** for character continuity, and enforce strictly **18 to 24 spoken words (~20 words)** per 10-second clip.

2. UPLOAD YOUR 3 REFERENCE ASSETS IN GOOGLE FLOW

CHIP 1 // Avatar (Me)
One clear, eye-level chest-up headshot with clean studio lighting.

CHIP 2 // Outfit (cloth_1)
One flat-lay photo of your signature long-sleeve blazer or crewneck.

CHIP 3 // Room (background_1)
One 16:9 photo of your studio or office with strictly zero people.

3. GENERATE & EXPORT YOUR 10-SECOND CLIP (STEP-BY-STEP)

1. **Step 1:** Paste **Master Prompt #2** into Antigravity to generate 3 sequential 10-second scene prompts.
2. **Step 2:** Open Google Flow, select **Video (16:9, 10s)**, and attach your 3 reference chips (**Me**, **cloth_1**, **background_1**).
3. **Step 3:** Paste Scene 1 and click **Generate**. Voiceover finishes at ~8.8s with a natural breath!
4. **Step 4:** Click **Download MP4 (1080p)** and save into *04_Exports/Clip_01.mp4*.

COPY-PASTE MASTER PROMPT #2 (~20-WORD SCENE GENERATOR):

```
Using my rules in 01_Brain_Rules/AGENTS.md, write 3 sequential 10-second Google Flow scene prompts about [INSERT TOPIC]. Keep each spoken dialogue strictly between 18 and 24 plain words (~20 words), and format each clip on a single line:
Presenter says: "[18-24 spoken words]" Camera: With reference to me avatar, wearing cloth_1 with background background_1, [35mm cinema framing & gesture]
```

Next Step (→ Open PDF-04): Access 15 plug-and-play scene templates and setup support details in **PDF-04**!
