PDF-03: Google Flow 10-Second Video Walkthrough

Foundation Step 3: Pairing 3 Reference Photos with ~20-Word Scene Prompts & Exporting 1080p MP4s (Page 1/2)

1. THE 3-CHIP + ~20-WORD FORMULA FOR GOOGLE FLOW (labs.google/fx/tools/flow)

Creators struggle with two roadblocks in Google Flow: (1) character outfits and studio rooms change randomly between clips, and (2) long spoken lines get cut off at the 10-second mark. Our formula solves both: attach **3 Reference Photos** on every prompt for visual continuity, and keep dialogue strictly between **18 and 24 spoken words (~20 words)**.

2. PREPARING YOUR 3 VISUAL REFERENCE CHIPS

CHIP 1 // Avatar (Me)
Clear, eye-level chest-up headshot with neutral expression and even key light.

CHIP 2 // Wardrobe (cloth_1)
Flat-lay photo of your signature long-sleeve blazer, sweater, or jacket. Zero big logos.

CHIP 3 // Studio (background_1)
16:9 wide shot of your office or studio room with strictly zero people in frame.

3. WHY ~20 SPOKEN WORDS (18–24 WORDS) IS THE GOLDEN PACING RULE

0.0s – 0.5s // Settle In
Avatar settles naturally into frame and takes an initial breath before speaking.

0.5s – 8.8s // 18–24 Words
At ~2.4 words/sec, 20 words finish cleanly at ~8.8s with natural cadence and emphasis.

8.8s – 10.0s // Clean Tail
1.2-second buffer ensures zero mid-syllable truncation and smooth cuts in editing.

PDF-03: Google Flow 10-Second Video Walkthrough

Foundation Step 3: Pairing 3 Reference Photos with ~20-Word Scene Prompts & Exporting 1080p MP4s (Page 2/2)

4. GENERATE & EXPORT YOUR 10-SECOND CLIP (STEP-BY-STEP)

1. **Step 1:** Paste **Master Prompt #2** below into Antigravity to generate your sequential 10-second scene prompts.
2. **Step 2:** Open **Google Flow** (*https://labs.google/fx/tools/flow*), select **Video (16:9 Landscape, 10s)**, and attach your 3 reference chips (**Me**, **cloth_1**, **background_1**).
3. **Step 3:** Paste Scene 1 into the prompt box and click **Generate**. Listen to verify clean audio completion at ~8.8s.
4. **Step 4:** Click **Download MP4 (1080p)** and save as *Clip_01.mp4*, *Clip_02.mp4*, etc.

COPY-PASTE MASTER PROMPT #2 (~20-WORD SCENE GENERATOR):

```
Using my rules in 01_Brain_Rules/AGENTS.md, write 5 sequential 10-second Google Flow scene prompts about [INSERT TOPIC]. Keep each spoken dialogue strictly between 18 and 24 plain words (~20 words), spell out all numbers, and format each clip on a single line:
Presenter says: "[18-24 spoken words]" Camera: With reference to me avatar, wearing cloth_1 with background background_1, [35mm cinema framing & natural two-handed gesture]
```

5. JOINING MULTIPLE 10-SECOND CLIPS INTO A FULL EPISODE

• **numbering convention:** Name exported clips sequentially (*01_Hook.mp4*, *02_Problem.mp4*, *03_Architecture.mp4*) so they drop straight onto any timeline (DaVinci Resolve, CapCut, Premiere) in exact chronological order.
• **2-Frame Crossfade Trick:** Add a subtle 2-frame audio fade at each clip boundary and lay a background music bed at **-22 dB** underneath for broadcast-grade continuity.
